Document 2: Shingaku Shihou IN2002-10, 17 May 2002

Document 3: JP 2003-68683 A (KDD Corporation), 28 February 2003

Document 1, section "4. Mobile IPv6 extensions to support MONETs", sets forth an invention wherein when a mobile router has moved to a fall-in network, the home address and c/o address of the mobile router, as well as the prefix of the network to which it belongs (corresponding to "all information relating to the auxiliary home address and c/o address" of this invention) are registered to the home agent.

However, in the invention of this application, the mobile router registers to a home agent an "auxiliary home address" which can specify the router and host to which a mobile outer belongs, which constitutes a difference.

Therefore the inventions set forth in claims 1 to 30
